

***** Note: Your file has not been replaced by this message. Your original file is still in the same location but now has a .ccsecure file extension appended to the file name.*****

The file **/All Files/FLAME/Analysis/Baseline visit/Abordaje/FLAME-**

Datos_nombres_09OCT2_DATA_2025-10-14_2036.csv > FLAME-

Datos_nombres_09OCT2_DATA_2025-10-14_2036.csv has content matching UCSF patient information. *All data with UCSF restricted information should be stored in a secure folder.*

Create a secure folder by adding Secure^ to the folder name (ex: "Secure^ Patient Data") then add files to the folder to have them encrypted. The following actions have been taken:

- The file has been encrypted, and can only be opened using the CipherCloud agent.
 - To download or verify that you have the CipherCloud agent installed, please visit <https://it.ucsf.edu/how-to/ciphercloud-agent>.
 - If accessing from a mobile device, visit the Apple App Store or Google Play Store to download the CipherCloud mobile app.

If you are a 3rd party (non-UCSF) collaborator to this folder, you will not be able to access this file.

For more information about how UCSF protects its restricted data see [CipherCloud](#) (MyAccess login required). Please contact the [UCSF IT Service Desk](#) at 415-514-4100 for assistance.
